

Energy Efficiency and Solar Power Systems

Have questions about solar and wind generated power?

Concerned about global warming and greenhouse gases, and want to do something to reduce the problem?

Want to generate your own 'green' electricity?

Sick of increasing power bills?

Need to learn easy ways to save on your power bills?

Designing a new energy efficient home or building?

Upgrading an old home or building to be energy efficient?

Unsure about how to go about generating renewable energy for your home or building?

Worried about the impact of BASIX legislation?

Come along and spend an afternoon or evening to learn about what you can do.

Courses held regularly - Bookings essential

Cost: \$40 per person
